Experience:

Roofing – Doliveira Systems offers a full complement of new, replacement, repair and fluid applied restoration roofing systems including single-ply EPDM rubber, TPO, TPA, PVC, modified bitumen, hot and cold applied built-up roofing, metal roofing, metal wall panels, spray polyurethane foam, vegetative roofing, roof coatings, photovoltaics and commercial shingles, slate, tile wood shakes. At DSystems we provide superior quality roofing services to our customers while exhibiting a professional team-oriented organization. We ensure that our customers are our primary focus, and we select projects for which our experience allow us to achieve maximum performance. DSystems have combined our capabilities with DJB Contracting Inc to give us an advantage over competitors when performing roofing contracts. Our program ultimately provides a better end product our clients can appreciate by knowing the job was performed with high standards and in a timely manner and within budget.

Electrical Services – our services consist of full complement of new electrical installations, electrical replacement and repairs, system designs, wire management, raceways, LED lighting, solar panel systems, panel upgrade, conduit duct banks, security cameras, switch gears, data/ethernet, access controls, receptacles, and much more. **We offer our customers 24/7 emergency electrical services for systems the customers need operational around the clock. Doliveira Systems can handle all your electrical needs.**

General Construction – our services consist of Design/Build projects. We have the expertise and past performance to successfully perform historical renovation/restoration projects. Quality control (QC) is the part of quality management that ensures products and service comply with requirements. It is a work method that facilitates the measurement of the quality characteristics of a unit, compares them with the established standards, and analyses the differences between the results obtained and the desired results to make decisions which will correct any differences. **We use proven management systems and procedures to monitor all aspects of a project's progress. Our past performance exemplifies that we safely complete complex quality projects on time and within budget.**

Ability to Manage and Perform Multiple, Simultaneous contracts - Critical to managing base work requirements and multiple task orders at multiple sites is maintaining an extensive pool of qualified personnel and subcontractors who will be assigned to contract from inception to completion.

DSystems is uniquely positioned to draw from the experience of having completed projects for the National Institutes of Health, General Services Administration, and a host of other Federal clients. We have an extraordinary team to provide electrical services, facility support services, architectural services, crosswalk repairs, repairs to sensor bollards, railings, flooring, concrete, painting, etc.

DOLIVEIRA SYSTEMS CAPABILITIES	
Capability	Description
Core Competency	For the past (6) six years providing preventative maintenance, repair services and emergency services to the White House. PM is a core competency of the DS Team.
NAICS	We currently perform under and meet the requirements of NAICS Code 236220 – Commercial and Institutional Building Construction.
Similar Customers	DSystems have been performing work on historic and occupied buildings, in both interior and exterior requirements, for many years. DSystems is uniquely positioned to understand how to work with GSA, NIH, NIST, DOD, FDA, DOJ, and a multitude of clients requiring high end, interior renovations.
Proven Track Record	Exemplary track record of successful Government contracts.
Occupied Space Experience	DSystems has extensive experience working in and around occupied facilities. We are currently working multiple IDIQ contracts in high-end occupied locations.
Significant Team	Extraordinarily comprehensive set of skills that will enable us to meet any situation of requirement for the project.
Surge Ready	Corporate structure in support of the Program Manager who supports the Site Project Leads to meet the expanding need through organic and third-party recruiting teammates.
Emergency Responsiveness	Lines of communication and situational readiness are incorporated in each project’s implementation.
Management Approach	Delivery based management structure with a three-tiered level of authority that guarantees communication, responsiveness, and results.
Technical Ability	DSystems and its teammates use technically qualified personnel, best practices, and proven technology

Task Order Delivery Management - We have an exceptional program management methodology and capacity. DSystems can provide emergency response and extended service hours in response to off-hour project requirements which are requested by the client and authorized by the DSystems Program Manager. The designated Program Manager will ensure that the identified deliverables are met with quality and timeliness. Daily quality reports are part of our Quality Assurance.
